

Healthcare Professionals:

Help your patients/clients maintain their independence by staying in their own home for as long as possible. Connect Care is hospital owned and operated by Halton Healthcare and all proceeds support hospital services and programs.

Know The Fall Facts:

- 1 in 3 people over the age of 65 have a major fall every year. That's 65 not 85.
- The key to a quick recovery after a fall is getting a quick response time. If you are found and helped within an hour the recovery can be as much as 95%. When that time goes to 2 or 3 hours that drops by 50%. That's a significant drop, and not just for that moment but for the long term.
- It's about ensuring safety and your peace of mind.

Integrity and Exceptional Service

The intelligent base unit has the capability to notify us when the device needs attention.

Your clients are Monitored 24 Hours A Day, 7 Days A Week for about \$1 a Day

- The battery life of the unit is 5 years.
- The unit also allows your client to answer the telephone remotely by pushing the red button when the phone is ringing, thus, preventing the risk of a fall when rushing to answer the telephone.
- Should a power outage or blackout occur, the intelligent base unit has a back up battery system that will notify our monitoring centre. Service is continued, even with a power outage or if a black out occurs. *Please note that this this applies to analog phone lines.
- Service is compatible with many non traditional phone service providers such as: Cogeco, Rogers, etc).
